

DR. NOOPUR PATEL — WEBSITE CONTENT & SEO MASTER BRIEF

Developer + AI Content Generation Document | Ahmedabad Breast Surgery Website

Purpose: This document is the single source of truth for the website developer and the AI/content system. It defines the website architecture, SEO strategy, page content requirements, conversion sections, legal-page requirements, internal linking, metadata, and content rules.

Important: Medical facts, credentials, hospital affiliations, prices, OPD timings, phone numbers, address, testimonials, awards, and outcome claims must be verified by the doctor/clinic before publication. Do not invent missing information.

SEO principle: The goal is not keyword stuffing. Every page should satisfy one primary search intent, use related semantic terms naturally, demonstrate medical expertise, provide useful information, and guide the visitor toward an appropriate consultation.

1. VERIFIED DOCTOR POSITIONING

Verified public information found during research:

- Dr. Noopur Patel — Breast Cancer Surgeon.
- MBBS, MS (General Surgery), Fellowship in Breast Surgery.
- Associate Consultant – Surgical Breast Oncology.
- Publicly listed expertise includes benign breast diseases, malignant breast diseases, mastectomy, breast-conservative surgery, oncoplastic breast surgery, and breast oncology clinical research.
- Public profile information lists a Max Healthcare Fellowship in Breast Oncology (November 2023–December 2024).
- Marengo Asia CIMS Hospital publicly lists Dr. Noopur Patel as a Breast Cancer Surgeon.
- CIMS publicly lists the hospital at Off. Science City Road, Sola, Ahmedabad – 380060.

Sources used for verification: Marengo Asia CIMS Hospital doctor profile; CIMS doctors/departments pages; Ahmedabad medical association publications. These sources should be rechecked before launch because affiliations, roles and schedules can change.

2. CORE SEO POSITIONING

Primary geographic market: Ahmedabad, Gujarat.

Core service theme: Breast surgery, breast cancer surgery, breast oncology, benign breast disease evaluation, oncoplastic breast surgery, breast-conserving surgery, mastectomy, reconstruction and related diagnostics.

Primary commercial intent: Patients and family members searching for a breast surgeon/specialist in Ahmedabad and people seeking information about breast lumps, breast cancer surgery, biopsy, fibroadenoma, reconstruction and treatment options.

3. PRIMARY KEYWORD MAP

4. RECOMMENDED WEBSITE ARCHITECTURE

The architecture combines the strongest elements observed in competitor research: clean treatment silos, dedicated procedure pages, strong doctor authority, local SEO, and an educational content cluster.

5. HOMEPAGE — COMPLETE CONTENT BLUEPRINT

5.1 SEO Metadata

Suggested Meta Title: Best Breast Surgeon in Ahmedabad | Dr. Noopur Patel

Suggested Meta Description: Dr. Noopur Patel is a Breast Cancer Surgeon in Ahmedabad offering breast cancer surgery, breast-conserving surgery, mastectomy, oncoplastic breast surgery and care for breast conditions. Book a consultation.

Suggested H1: Breast Cancer Surgeon in Ahmedabad – Dr. Noopur Patel

Canonical: [https://\[FINAL-DOMAIN\]/](https://[FINAL-DOMAIN]/)

5.2 Hero Section — Ready-to-use Draft

Eyeblink: BREAST CANCER & BREAST SURGERY

H1: Expert Breast Cancer & Breast Surgery Care in Ahmedabad

Supporting copy: Dr. Noopur Patel is a Breast Cancer Surgeon and Surgical Breast Oncology specialist in Ahmedabad, providing personalised evaluation and surgical care for breast cancer and other breast conditions.

Primary CTA: Book a Consultation

Secondary CTA: Explore Breast Surgery

Trust strip: MBBS • MS (General Surgery) • Fellowship in Breast Surgery

Developer note: Do not use “best” as a factual claim in the hero unless the client specifically wants the exact keyword. If used, use it naturally in supporting SEO copy rather than as an unsupported superiority claim.

5.3 About / Doctor Introduction

H2: Meet Dr. Noopur Patel – Breast Cancer Surgeon in Ahmedabad

Draft: Dr. Noopur Patel is a Breast Cancer Surgeon with training in general surgery and breast surgery. Her clinical focus includes benign and malignant breast diseases, breast cancer surgery, breast-conserving surgery, mastectomy and oncoplastic breast surgery. Her approach is centred on accurate diagnosis, personalised treatment planning and clear communication with patients and their families.

CTA: Learn More About Dr. Noopur Patel

Only add experience years, awards, memberships, publications, hospital names and additional fellowships after verification.

5.4 Services / Treatments

H2: Breast Surgery & Breast Cancer Treatment Services

Service	Short SEO/UX Description	Suggested URL
Breast Cancer Surgery	Surgical treatment planning for breast cancer based on diagnosis, stage and individual clinical factors.	/breast-cancer-surgery
Breast Conservation Surgery	Breast-conserving surgery may be considered for selected patients depending on tumour and treatment factors.	/breast-conservation-surgery-ahmedabad
Mastectomy	Surgical removal of breast tissue when clinically indicated as part of breast cancer treatment.	/mastectomy-ahmedabad
Oncoplastic Breast Surgery	Combines cancer surgery principles with breast reshaping techniques when appropriate.	/oncoplastic-breast-surgery-ahmedabad
Sentinel Lymph Node Biopsy	A procedure used to evaluate selected lymph nodes in the staging and treatment of breast cancer.	/sentinel-lymph-node-biopsy
Breast Lump Evaluation	Assessment of breast lumps using clinical examination and appropriate diagnostic tests.	/breast-lump-treatment-ahmedabad
Fibroadenoma Evaluation & Treatment	Assessment and management of fibroadenoma based on age,	/fibroadenoma-treatment-ahmedabad

	symptoms, imaging and clinical findings.	
Breast Biopsy	Diagnostic evaluation of suspicious breast findings using an appropriate biopsy method.	/breast-biopsy-ahmedabad
Breast Reconstruction	Reconstructive options after breast cancer surgery, only where offered and clinically appropriate.	/breast-reconstruction-surgery-ahmedabad

5.5 Why Choose / Trust Section

H2: Personalised Breast Cancer Care, From Diagnosis to Treatment

- Specialised focus on breast cancer and breast surgery
- Evidence-based treatment planning
- Clear explanation of diagnosis and treatment options
- Patient-centred consultation
- Coordination with relevant oncology specialists when multidisciplinary care is needed
- Transparent guidance about the next appropriate diagnostic or treatment step

Do not use generic superlatives such as “No.1”, “best”, “guaranteed cure” or “100% success” without a legitimate, verifiable basis.

5.6 Conditions Section

H2: Breast Conditions We Evaluate

- Breast lump
- Fibroadenoma
- Breast pain
- Nipple discharge
- Benign breast conditions
- Breast cancer and malignant breast diseases

CTA: If you have a new or persistent breast change, book a clinical evaluation rather than relying on online information alone.

5.7 Patient Testimonials

H2: Patient Experiences

Use only genuine patient reviews with appropriate consent. Do not fabricate reviews or rewrite them to make them more positive. Display reviewer name/initials only according to consent and privacy requirements.

Suggested card fields: Patient name/initials • Treatment category • Review • Optional date

5.8 FAQ

- When should I see a breast surgeon in Ahmedabad?
- Is every breast lump cancerous?
- What does a breast cancer surgeon do?
- What is breast-conserving surgery?
- When is a mastectomy recommended?
- What is a sentinel lymph node biopsy?
- Can fibroadenoma be treated without surgery?

- How is a breast lump diagnosed?
- How can I book a consultation with Dr. Noopur Patel?

6. ABOUT PAGE — CONTENT BLUEPRINT

H1: Dr. Noopur Patel – Breast Cancer Surgeon in Ahmedabad

Intro: Dr. Noopur Patel is a Breast Cancer Surgeon and Associate Consultant in Surgical Breast Oncology. Her training includes MBBS, MS (General Surgery) and Fellowship in Breast Surgery. Her clinical interests include benign and malignant breast diseases, breast cancer surgery, breast-conserving surgery and oncoplastic breast surgery.

Suggested sections

- Professional Introduction
- Education & Training
- Breast Oncology Fellowship
- Clinical Expertise
- Areas of Special Interest
- Professional Experience
- Hospital Affiliations
- Research / Publications
- Professional Memberships
- Patient Care Philosophy
- Book Consultation

7. SERVICE PAGE MASTER TEMPLATE

Every treatment page must be written for one primary keyword/search intent. Do not create thin pages that repeat the same paragraphs with only the keyword changed.

- SEO title + meta description
- Breadcrumb
- H1 with primary keyword/topic
- Short clinical introduction
- What is [procedure/condition]?
- Why is it done?
- Who may be considered?
- How is it performed?
- Before the procedure
- After the procedure / recovery
- Possible risks and limitations
- Alternative treatment options where relevant
- How treatment decisions are made
- Frequently asked questions
- Doctor expertise
- Related services
- Appointment CTA
- Location/contact block

8. EXAMPLE SERVICE PAGE — BREAST CONSERVATION SURGERY

Suggested URL: /breast-conservation-surgery-ahmedabad/

Meta Title: Breast Conservation Surgery in Ahmedabad | Dr. Noopur Patel

Meta Description: Learn about breast conservation surgery, when it may be considered, how the procedure is planned, recovery, risks and follow-up. Consult Dr. Noopur Patel in Ahmedabad.

H1: Breast Conservation Surgery in Ahmedabad

Intro draft: Breast conservation surgery is a breast cancer operation designed to remove the cancerous area with a surrounding margin of tissue while preserving as much of the breast as clinically appropriate. Suitability depends on factors such as tumour characteristics, breast size, imaging findings, cancer stage and the overall treatment plan.

Required semantic coverage: lumpectomy, partial mastectomy, breast-conserving surgery, breast cancer surgery, tumour removal, surgical margins, radiation therapy, recovery, oncoplastic techniques.

Important medical rule: Do not promise cosmetic outcomes or imply that every patient is suitable for breast conservation. Treatment decisions must be individualised by the treating team.

9. BLOG STRATEGY

Blog Topic	URL	Primary Keyword	Intent
Is Every Breast Lump Cancerous?	/blog/is-every-breast-lump-cancerous	is every breast lump cancerous	Educational
Fibroadenoma vs Breast Cancer	/blog/fibroadenoma-vs-breast-cancer	difference between fibroadenoma and breast cancer	Educational
Is Breast Lump Surgery Covered by Mediclaim in India?	/blog/breast-surgery-mediclaim-coverage	breast lump surgery covered by mediclaim in india	Financial / Informational
Breast Lump: Causes, Diagnosis & When to See a Doctor	/blog/breast-lump-causes-diagnosis	breast lump treatment Ahmedabad	Condition
Breast Cancer Surgery: What Patients Should Know	/blog/breast-cancer-surgery-guide	breast cancer surgery Ahmedabad	Commercial / Educational
Lumpectomy vs Mastectomy	/blog/lumpectomy-vs-mastectomy	lumpectomy vs mastectomy	Educational
Sentinel Lymph Node Biopsy in Breast Cancer	/blog/sentinel-lymph-node-biopsy	sentinel lymph node biopsy Ahmedabad	Educational
Breast Cancer Stages Explained	/blog/breast-cancer-stages	breast cancer stages	Educational
What Does a Breast Biopsy Show?	/blog/breast-biopsy-results	breast biopsy Ahmedabad	Educational

Each blog must link contextually to at least 2 relevant service pages and the consultation page. Each service page should link back to relevant educational content.

10. LOCAL SEO / LOCATION PAGES

Create location pages only where there is a legitimate clinical/service relevance. Do not create doorway pages with near-identical copy just to target neighbourhood names.

- SG Highway / Thaltej / Bodakdev — only if the clinic location and service area justify this page.
- Sola / Science City — relevant if the doctor practises there or serves patients from the area.
- Satellite / Shyamal / Prahlad Nagar — use as service-area references or a genuine location page where appropriate.
- Navrangpura / Ellisbridge — only if clinically and geographically relevant.
- Maninagar — only if there is a real reason to target this area.

Every genuine location page should contain unique local information, clinic address, map, appointment details, nearby landmarks/areas, doctor information, services available at that location, and unique helpful content.

11. COST & INSURANCE CONTENT

Cost pages can capture high-intent searches but must be handled carefully. Do not publish fixed prices unless the clinic confirms them and they are kept current.

Suggested page: Breast Lump Removal Surgery Cost in Ahmedabad

Suggested structure: factors affecting cost → consultation and diagnosis → procedure/hospital/anesthesia factors → pathology → follow-up → insurance/TPA questions → how to get an accurate estimate.

Insurance wording: “Coverage depends on the policy, indication, insurer and pre-authorisation requirements. Patients should confirm benefits and approvals with their insurer/TPA and hospital billing team.”

12. PRIVACY POLICY — DRAFT REQUIREMENTS

The developer should create a dedicated Privacy Policy page covering the website's actual data collection and processing. The final legal wording should be reviewed by the clinic's legal advisor.

- Information collected through appointment/contact forms
- Name, phone number, email and other fields actually collected
- Medical information only if the form explicitly collects it
- Purpose of collection: appointment handling, enquiry response and patient communication
- How data is stored and protected
- Who may receive the information, such as authorised clinic staff or service providers
- Cookies and analytics, if used
- Third-party services such as Google Maps, analytics, WhatsApp or appointment software, if used
- Data retention
- User rights and contact method
- Security limitations
- Children's privacy, if relevant
- Policy update procedure
- Effective date

Developer rule: Do not claim that the site is HIPAA-compliant, ISO-certified, encrypted end-to-end, or compliant with a particular law unless the clinic can substantiate the claim.

13. TERMS & CONDITIONS — DRAFT REQUIREMENTS

- Website is for general information and does not replace a consultation or emergency medical care.
- No diagnosis should be made solely from website content.
- Appointment requests are subject to confirmation.
- Treatment suitability and final medical decisions are determined by the treating doctor.
- Information may change and the clinic may update website content.
- Intellectual property and permitted use of website content.
- External links and third-party services.
- Limitation of liability to the extent permitted by applicable law.
- Governing law and jurisdiction — insert the legally approved jurisdiction.
- Contact details for questions.

14. MEDICAL DISCLAIMER

Draft: The information on this website is provided for general educational purposes and is not a substitute for professional medical advice, diagnosis or treatment. Medical conditions vary from person to person. Treatment options, risks, benefits and expected recovery can differ based on individual clinical circumstances. Please consult a qualified healthcare professional for personalised medical advice. In an emergency, seek immediate medical attention through appropriate emergency services.

15. FOOTER CONTENT

Footer columns:

- Dr. Noopur Patel — Breast Cancer Surgeon
- Breast Surgery
- Breast Cancer Treatment
- Breast Conditions
- Patient Resources
- Book Appointment
- Contact
- Privacy Policy
- Terms & Conditions
- Medical Disclaimer

Footer SEO sentence: “Dr. Noopur Patel provides breast cancer surgery and breast care services in Ahmedabad, Gujarat.” Use only if accurate for the final practice location.

16. SEO ON-PAGE RULES FOR DEVELOPER

- One clear H1 per page.
- Use the primary keyword naturally in the title, H1, introduction and at least one relevant subheading where appropriate.
- Use related entities and semantic terms naturally instead of repeating the exact keyword excessively.
- Keep URLs short, descriptive, lowercase and stable.
- Use canonical URLs.
- Add unique title tags and meta descriptions for every indexable page.
- Use descriptive image filenames and accurate alt text; do not keyword-stuff alt text.

- Compress images and use modern formats such as WebP/AVIF where supported.
- Ensure mobile-first responsive design.
- Keep Core Web Vitals and page performance in good condition.
- Add breadcrumbs.
- Create XML sitemap and robots.txt.
- Ensure important content is crawlable and not hidden behind interactions that prevent search engines from accessing it.
- Use internal links with descriptive anchor text.
- Avoid duplicate or near-duplicate location pages.
- Add author/doctor attribution to medical educational content.
- Show publication/update dates where useful and keep them accurate.

17. STRUCTURED DATA / SCHEMA REQUIREMENTS

Google states that structured data can help it understand page content, but structured data does not guarantee a rich result. Implement only markup that accurately represents visible page content and validate it before launch.

- Organization / LocalBusiness information for the clinic/practice where appropriate.
- Person/Profile information for the doctor profile where appropriate.
- BreadcrumbList on hierarchical pages.
- Article/BlogPosting for genuine blog articles, with accurate author and date information.
- FAQPage only when the page visibly contains the relevant FAQ content and current Google eligibility rules are followed.
- Do not fabricate Review/AggregateRating markup or add ratings that are not legitimately represented.

Developer reference: Google Search Central documentation on Search appearance and structured data; LocalBusiness structured data; Organization structured data; Article structured data.

18. INTERNAL LINKING PLAN

From	Link To	Anchor Concept
Home	Breast Cancer Surgery	breast cancer surgery in Ahmedabad
Home	About	Dr. Noopur Patel
Home	Breast Conservation Surgery	breast conservation surgery
Breast Lump Blog	Breast Lump Treatment	breast lump evaluation and treatment
Fibroadenoma Blog	Fibroadenoma Treatment	fibroadenoma treatment
Breast Cancer Surgery	Sentinel Node Biopsy	sentinel lymph node biopsy
Breast Cancer Surgery	Mastectomy	mastectomy surgery
Breast Conservation Surgery	Oncoplastic Surgery	oncoplastic breast surgery
All service pages	Contact	book a consultation
All blogs	Relevant service page	contextual related treatment
About	Appointment	book consultation with Dr. Noopur Patel

19. CONVERSION / UX REQUIREMENTS

- Sticky mobile CTA: Call / WhatsApp / Book Appointment, subject to clinic preference.

- Hero CTA visible without scrolling.
- Appointment form should be short: Name, Phone, Preferred Date/Time, Reason for Consultation, optional Message.
- Do not request sensitive medical information unless genuinely necessary.
- Show clinic location and map.
- Show OPD timings only after verification.
- Use click-to-call phone links.
- Use WhatsApp only if the clinic has an official number and wants WhatsApp communication.
- Include clear emergency disclaimer; the website is not an emergency service.

20. AI CONTENT GENERATION RULES

The developer may provide this section to the AI system as its permanent content-generation instruction:

“You are the medical website content engine for Dr. Noopur Patel, Breast Cancer Surgeon and Surgical Breast Oncology specialist in Ahmedabad. Generate original, medically responsible, patient-friendly and SEO-focused website content. Never copy competitor text. Never invent qualifications, procedures, prices, hospital affiliations, reviews, success rates, patient outcomes or medical claims. Use the assigned primary keyword naturally and cover related semantic entities. Prioritise search intent, clinical clarity, trust, readability and conversion. Avoid keyword stuffing. Avoid guaranteed outcomes. For medical topics, use cautious language such as ‘may’, ‘can’, ‘depending on individual circumstances’ where clinically appropriate. Every service page must include what the condition/procedure is, why it may be recommended, who may be considered, how it is performed, preparation, recovery, risks/limitations, FAQs, related services and a consultation CTA. Include Ahmedabad naturally where geographically relevant. Keep content original and useful. Any missing doctor-specific fact must be marked [VERIFY] rather than invented.”

21. PAGE-BY-PAGE AI REQUEST FORMAT

When the developer asks the AI for a page, the request should include:

1. Page name
2. URL slug
3. Primary keyword
4. Secondary keywords
5. Search intent
6. Target audience
7. Required H1
8. Meta title
9. Meta description
10. Required sections
11. Internal links to include
12. CTA
13. Doctor facts allowed
14. Facts requiring verification
15. Medical/legal restrictions

22. CONTENT QUALITY CHECKLIST BEFORE PUBLISHING

- Does the page answer the search query immediately?

- Is there one clear primary intent?
- Is the primary keyword used naturally?
- Are related terms and entities covered?
- Does the page demonstrate doctor expertise without unsupported claims?
- Are medical statements reviewed/approved by the doctor or qualified medical reviewer?
- Are claims, credentials and affiliations verified?
- Are costs and insurance statements current?
- Are testimonials genuine and consented?
- Are images licensed/owned and appropriately described?
- Are title, meta description, H1, URL and canonical unique?
- Are internal links relevant?
- Is the CTA clear?
- Is the page mobile-friendly and fast?
- Is structured data accurate and validated?
- Is the page free of copied competitor text?

23. LAUNCH TECHNICAL SEO CHECKLIST

- HTTPS enabled
- Indexability verified
- Robots.txt verified
- XML sitemap generated and submitted
- Canonical tags verified
- 404 page configured
- 301 redirects configured for changed URLs
- Open Graph / social sharing metadata configured
- Favicon and site identity configured
- Google Search Console connected
- Google Analytics / chosen analytics configured with appropriate consent
- Google Business Profile website URL consistent with final domain
- Local business information consistent across website and major profiles
- Schema validated
- Core Web Vitals checked
- Mobile usability checked
- Contact and appointment forms tested
- Email/WhatsApp notifications tested
- Spam protection added to forms
- Privacy/cookie consent implemented where required by the actual setup and applicable law

24. IMPORTANT CONTENT GUARDRAILS

- Do not use “100% cure”, “guaranteed result”, “risk-free”, “painless” or similar absolute claims unless medically and legally appropriate and specifically verified.
- Do not imply that a particular procedure is suitable for everyone.
- Do not create fake patient stories.
- Do not use fake ratings or fake review schema.
- Do not publish confidential patient information or identifiable clinical images without appropriate consent.
- Do not use competitor text, images or testimonials.
- Do not create location pages that exist only to manipulate local search.

- Do not promise a Google ranking position or a specific SEO score. SEO scores from plugins/tools are diagnostic aids, not ranking guarantees.

25. FINAL DEVELOPER DELIVERABLE

The final website should feel like a specialist medical practice rather than a generic template. The design should communicate clinical expertise, calmness, trust, privacy and clarity. SEO should be integrated into the information architecture from the beginning rather than added after the UI is finished.

Priority order: 1) Medical accuracy and trust → 2) Clear patient experience → 3) Search intent and topical authority → 4) Technical SEO → 5) Conversion optimisation → 6) Visual polish.
